VIFLY Finder 2 Drone Buzzer

The VIFLY Finder V2. The most intelligent drone buzzer. Self-powering to work even after the quad battery ejection.

About this product

Buzzers are a great safeguard to add on any drone. This small investment can save you hundreds of dollars. The super loud alarm will alert you to where you lost your quad.

The VIFLY Finder V2 adds additional features beyond just a simple buzzer when it detects a crash. Want a wireless buzzer solution? [Check out the VIFLY Beacon.](#)

Advanced ViSense Technology

With ViSense-based technology, the VIFLY Finder 2 can power itself to beep even the quad battery has been ejected. Even more, the built-in light sensor can detect light intensity and then smartly control the LED light to flash. Besides, it enables the buzzer to automatically enter into sleep mode at night to save power and not disturb.

Much Louder than Standard Buzzer

To easily find the lost drone in long-distance, the VIFLY Finder 2 buzzer is designed to install a very loud beeper that the DB is over 100.

Two Options to Disarm the Buzzer

Disarm with button: Disconnect the main battery, hold the disarm button on VIFLY Finder 2 for 1-5 seconds then release.

Disarm with main battery: Disconnect the main battery, then connect the main battery for 3-6 seconds and disconnect it again.

It will beep 3 times when disarmed successfully.

Compatible with Both FPV quadcopter and RC Airplane

VIFLY finder 2 is programmed to be compatible with any flight controllers to support FPV quad and receivers for RC airplanes. No extra setting required it will automatically recognize the device to connect.
